

Rituranjan Gupta

Python & Data Analysis Engineer

A Cloud, Python, PL/SQL, C#, engineer passionate about cutting-edge technology and solving real-world problems, with 14+ years of experience in predictive modelling, object detection, and computer vision.

Expertise in the development & implementation of ML models in real-time projects.

Microsoft Azure certified Microsoft Azure Fundamentals Developing Solutions for Microsoft Azure (AZ-204) Microsoft Azure Data Engineering Associate

Work experience

Principal Consultant

Audax Labs / Since July 2020

- Designed and developed Microsoft live Traffic/ Accident predictive object detection and tracking system based on yolov4 & TensorFlow architecture. technology was used Azure, python , Django, SQL-Server, Power bi, Reacts
- Designed and developed Luz Capital fund and asset management system technology was used, python , Django, C#, SQL-Server, Power bi, Reacts
- Designed and developed a form & bill recognition system on Azure cognitive services the technology used AZURE, Python, NLP, and ReactJS.
- Managing the team of more than 10 people involved in the technical recruitment process.

Solution Developer L2

Sapient Gurgaon Oct 2019 - Jul 2020

- Design & develop automatic dispatch, & inspection portal using face recognition technology was used AZURE, web-logic, serverless function Python, SQL server, Power Bi, Team size -30
- Inspection mobile app (Python, React-Native ,SQLite, rest api)

Senior Software Engineer

Havells India Ltd Jan 2019 - Sep 2019

- Design & develop real time vehicle & goods management system technology was used firebase, react-native flask google map, AZURE, web-logic, serverless function.
- Design & develop SAMPARK loyalty program(earn reward Points) technology was used python flask ,MySQL, Angular. **Team Lead**
NYSA Communication Pvt. Ltd.
- Self Finance School (Maharashtra Government)**Multilanguage language input & display(Hindi,English,Marathi) Application for new school or up gradation for existing seven layer of school approval process block level to ministry if any one reject than recycle process for reapprove and maintain the reason, technology used for Python,XML,XSLT,C#,MVC
- Central University Of Kashmir (ERP)** Automate admissions. Eliminate manual processes and save significant staff time by enabling prospective students to apply online through a selfservice portal Provide one-stop student access. Allow students to enrol, register, and pay for courses through the portal Python,XML,XSLT,C#.net core

Key skills

Python, Django, flask

ML Algorithms, Predictive Modelling

Data analysis: Azure Synapse, ADF, Talend, PL/SQL Power BI

Cloud: Azure, GCP

DevOps: Git, Bitbucket, CI-CD pipeline, Docker

Other : ASP.net, C#, ReactJs, JQuery

Software skills

Python

OpenCV, TensorFlow

PL/SQL

Azure

Google Cloud Platform

Docker

Git

ReactJS

JQuery

Java

MongoDB

English

Hindi

Web portal# Media Valet Plugin Development
Client Media Valet (<https://www.mediavalet.com/>)
Technology MS-Azure,MVC5,Web API ,Angular-JS, JQuery
App Store Link <https://papps.mediavalet.com/>
Office Store- <https://store.office.com/search.aspx?qu=mediavalet>
<https://play.google.com/store/apps/details?id=com.mediavalet.mobileapp&hl=en>

Abstract: World to 20 digital asset management in Azure Cloud Plugin development
1) Office Add In,<https://store.office.com/search.aspx?qu=mediavalet>
2) SharePoint Add In,
3) Marketing Automation Oracle Eloqua
4) Outlook Integration
5) WordPressess
6) Drupal
7) Work-front

My Role 1)Team Management 2)
Design & Development

Web App# **Media Valet Plugin Development**
Client Media Valet (<https://www.mediavalet.com/>)
Technology MS-Azure,MVC5,Web API ,Angular-JS, JQuery
App Store Link <https://papps.mediavalet.com/>
Office Store- <https://store.office.com/search.aspx?qu=mediavalet>
[https://play.google.com/store/apps/details?id=com.mediavalet.mobile](https://play.google.com/store/apps/details?id=com.mediavalet.mobileapp&hl=en)
[app&hl=en](https://play.google.com/store/apps/details?id=com.mediavalet.mobileapp&hl=en)

Abstract: World to 20 digital asset management in Azure Cloud Plugin development
1) Office Add In,<https://store.office.com/search.aspx?qu=mediavalet>
2) SharePoint Add In,
3) Marketing Automation Oracle Eloqua

7) Work-front

My Role 1)Team Management 2)
Design & Development

Web App# **Han insight**
Team Size 8 Duration: 1.5 Years
Client HANU/Dynapt Solution
Technology MVC4 ,Web API, Angular JS, IIS 8,Microsoft Azure ,Power Shell ,C# ,
Power Bi, Cloud Services, Web job

App Store Link <https://hanu.com/insight/>

Abstract: Maximize your Azure investment with total end-to-end visibility of your Azure spend. Hanu Insight for Microsoft Azure delivers the cloud governance and financial management you need in a familiar interface consistent with Azure itself. Enjoy self-service simplicity and seamless integration into your existing environment with Hanu-Insight. OS, using portal)

My Role	1)Written Power shell program for automatic VM creation, 2)Window Azure customization(using c#, web API, jQuery, CSS) 3)Website/Database as a services 4)Database design(include multiple server Query, Table, view, stored procedure, triggers)
----------------	---

Web App#	MeghRaj (Private/public) Cloud Government of India
Team Size 12 Client/Company Technology	Duration: 9 Months Indian Government(National Information Center(NIC))/ Dynapt Solution C#, Web API, Configuration Private Cloud using PowerShell, Hyper-V ,SCVMM, SCOM, Window Azure customization Load balancing ,Failover Cluster, Hyper-V, SCVMM, SCOM for reporting generation
App Store Link	Client Portal https://cloud.gov.in/
Abstract:	In order to utilize and harness the benefits of Cloud Computing, Government of India has embarked upon an ambitious initiative - "GI Cloud" which has been named as 'MeghRaj'. The focus of this initiative is to accelerate delivery of e-services in the country while optimizing ICT spending of the Government.

My Role	1) Window Azure customization(using C#, web API, jQuery, CSS) 2) Design infrastructure (Failover Cluster, Hyper-V, SCVMM) 3) Written Power shell program for VM creation ,Load Balance, connect with Hyper-V,SCOM,SCVMM
----------------	---

Web App#	Central University Of Kashmir (ERP)
Technology Project Descriptions:	Angular 7.0.0,,Python, Web API, LINQ, , Angular Data Tables, Angular Material - Automate admissions. Eliminate manual processes and save significant staff time by enabling prospective students to apply online through a self-service portal - Provide one-stop student access. Allow students to enroll, register, and pay for courses through the portal - Simplify records management. With a single system for all data needs—and a single digital record for each student —any department on campus can find the student information they need - Engage faculty. Give faculty the means to enter and update grades, and have personalized access to timely, accurate, and institution-wide information - Manage resources. Manage personnel, funds and processes more transparently - Strengthen decision-making. Track the metrics you need to guide day-to-day operations, meet reporting requirements, and engage the organization.
My Role	1) Design and development 2) Testing & Maintenance Provide L3 level support for Application 3) SRS documentation 4) Followed Quality Process as per company norm

- 5) Deployed Application on Production and UAT Server

Education

M-Tech

Manav Bharti University Solan, Himachal

Specialism in Information Technology

MSc computer science (3 years)

Sikkim Manipal University

Machine Learning Projects

Car identification based on body type-

- Build an extremely accurate transfer learning based CNN model for detection and identification of car based on body type like (Sedan,SUV,MUV, Hatchback) using TensorFlow object detection API, OpenCV. and python.

Used car price prediction-

- Conducted full EDA and regression analysis of relationship between car price and features affecting the price.
- Build an advance predictive regression model that is both extremely accurate and lean.
-
